

*Parents and Teachers are invited to
Dr. William Stixrud's Lecture and Q & A*

Executive Functioning:
Understanding and Developing the Brain's Command
and Control System

Wednesday, November 5th • 7:00pm~9:00pm.
@ the Hill Center / 921 Pennsylvania Ave.SE

This event is FREE of charge, but space is limited.
RSVP at LearningSpecialistOnTheHill@gmail.com

Learn:

- Why Executive Functions contribute more strongly to academic success than IQ and play an even stronger role in life success.
- How parents and teachers can work to foster the development of these important skills.
- Strategies for accommodating students with executive dysfunction at home and in school.
- Useful insights from brain research for understanding and promoting the development of executive functions in children and teens.

**Dr. William Stixrud is a clinical neuropsychologist and popular speaker, with 35 years' experience helping children maximize talents.*
