Steps for Insurance Precertification

Once you have ascertained that precertification is required for either procedure code 96101 or 96118, The Stixrud Group, LLC will call your insurance company.

The clinical information outlined below is needed prior to your first appointment. The requisite forms were mailed to you when you first scheduled with this office. We cannot complete the pre-certification request without this material. It is highly advisable to allow a minimum of ten business days for us to complete the paperwork, forward it on to the insurance carrier, and allow the insurance carrier to process this request prior to your first day in our office. There are some insurance companies, however, which require an office appointment before precertification is requested. In this case, we will prepare the pre-certification ahead of time, but submit the request on the date of your first appointment. Regardless of pre-certification, **you will still be responsible for paying the fee in full and for submitting the insurance form at the conclusion of the evaluation process.**

Please send the following required clinical information needed for insurance precertification by mail:

1. Completed Pediatric (or Adult) Neuropsychology Questionnaire
2. Completed Parent Rating Scales: Child Behavior Checklist, BRIEF

In addition, please send a copy of your insurance card, front and back, to peyster@stixrud.com, or by mail.
